ABOUT US

WA Security Services is a locally operated security agency based in Midland, Western Australia. We specialise in providing licensed guards, on-site security operations, CCTV deployment and monitoring, and rapid emergency response. Our approach is hands-on, flexible, and built to match the unique demands of each client.

We understand that security isn't just about presence — it's about prevention, fast action, and accountability. That's why our services go beyond the basics. From coordinating guard shifts to setting up surveillance and responding to urgent incidents.

WHY CHOOSE US

We don't lock you into complicated contracts or make promises we can't back up. We simply show up and stay sharp – every day, every shift.

Licensed Guard

Every guard we assign is fully licensed, trained, and vetted to meet WA security standards. They're not just present – they're alert, accountable, and ready to respond when it matters most.

Operational Supervision

We don't just send guards – we actively manage them. From shift monitoring to incident oversight, our operations team ensures protocols are followed, issues are reported, and nothing slips through.

Clear Communication

You won't be left in the dark. We keep communication open and simple – regular updates, fast reporting, and direct contact so you always know what's happening on your site.

Tailored Plans

No two businesses face the same risks. That's why we take time to understand your site and schedule, then design a protection plan that fits – not one pulled from a template.

OUR SERVICES

In security, there's no room for guesswork. That's why our services are built on precision, readiness, and trust. Whether you need static guards or full-scale operations, we deliver what's promised—consistently.

- Event Security
- Retail Security
- Crowd Control
- Assets Protection
- Clubs and Pubs
- School Security
- Hosital Security
- Mining and Construction Sites

OUR PROCESS

Our step-by-step approach ensures complete coverage with zero guesswork.

Site Visit & Risk Assessment

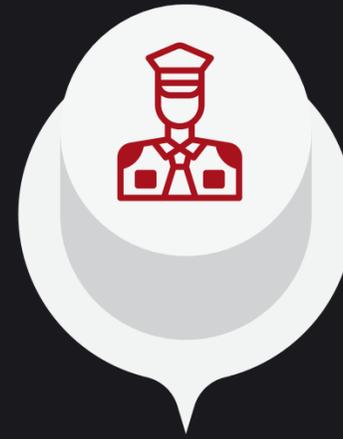

We inspect the site, identify risks, and understand your security needs.

Custom Plan Design

A tailored security strategy is built to match your environment and goals.

Guard Deployment & Setup

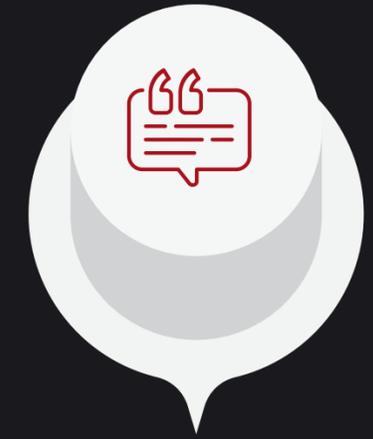

Professional, licensed guards are deployed with all required equipment.

Daily Reporting & Check-ins

We provide real-time updates and incident logs to keep you informed.

Post-Operation Review & Feedback

After service completion, we assess performance and refine for future needs.
